

Bantam

the proven
tractor line

1953

Three models, 2 HP—5 HP—8 HP, with 19 heavy-duty precision-engineered attachments. The Bantam tractor—its well-balanced heavy-duty machine—is completely engineered and manufactured in our own plants. It is not new—Bantam has been proving successful by thousands of hours, farms, industrial and institutional users.

14" Heavy-Duty Front Loader

There's always a Bantam's portable power drive attachment with steel hardened oil gear transmission handling 2 speeds forward and 1 reverse—gear reduction of 20 to 1. Developed by Bantam for best machine use, this differential typifies the precision engineering of the Bantam Tractor.

An opportunity for you . . .

Bantam has been established and enriched successfully over a period of years in 18 states and neighboring states. Now with our expanded facilities and increased production, Bantam will be marketed and advertised nationally—making it possible for us to offer a limited number of exclusive distributor and dealerships.
